

Document title is where we serve

Document language is English

There is an illustration showing different aspects of the energy extraction value chain including an offshore oil rig, drill ship, wind turbines, onshore drilling, refineries, petrochemical plants, and office headquarters

From the left

Offshore oil

Offshore Life

Keeping workers comfortable, safe, and strong while on land or sea

Wind turbines

Renewables

Ensuring reliability in power generation with preventative and corrective maintenance

Onshore drilling

Onshore extraction

Providing flexible service and support to scale with your production goals

Refinery and petrochemical plant

Refineries and plants

Supplying responsive care of critical equipment, infrastructure, turnarounds, and your most important asset – your people

Accessible Document

Office buildings

Headquarters and offices

Managing your entire portfolio of workplaces to enhance employee experience, taking them from operational to exceptional
