

# Top 3 Cyber Risk Reductions Your Team can start Today

Solutions Level

1

Identify Inventory and Capabilities

2

Prioritization of Devices and Risks

3

Optimizing and Expanding Risk Reduction IITM Actions

Baseline

Manually Inventory with IPConfigs

Prioritize by:  
Impact on Patient + Safety + Business

Manufacturer approved patches  
Non-urgent patches

Intermediate

Automate the process with an IOT Partner

Prioritize by:  
Device Vulnerability  
Likelihood of Exploitation

Clear list of patches  
• What & when

Advanced

Collaborate with IOT partner for device identification and digitization

Combine & Analyze Identify Highest risk & severity

Bring IT and IITM teams together for Combined expertise

Document title is Top 3 Cyber Risk Reductions Your Team Can start Today

Document language is English

There is an illustration showing three different cyber risk reductions that your HTM can take, with each having three varying solutions levels

Risk Reduction One, Identify Inventory and Capabilities

Baseline Solutions Level, Manually inventory with IP Configs

Intermedia Solutions Level, Automate the process with and IoMT partner

Advanced Solutions Level, Collaborate with IoMT partner for device identification and digitization

Risk Reduction Two, Prioritization of Devices and Risks

Baseline Solutions Level, Prioritize by impact on patient safety and business

Intermedia Solutions Level, Prioritize by device vulnerability and likelihood of exploitation

Advanced Solutions Level, Combine and analyze to identify highest risk and severity

Three, Optimizing and Expanding Risk Reduction HTM Actions

Baseline Solutions Level, Manufacturer approved patches and non-urgent patches

Intermedia Solutions Level, Clear list of patches, what and when

Advanced Solutions Level, Bring IT and HTM teams together for combined expertise
