

Document title is hurricane preparedness

Document language is English

Hurricanes are the most powerful weather events on the planet, and climatologists predict that the 2022 hurricane season will be above average in quantity and severity.

Plan

The Crisis Management Plan details specific roles and responsibilities. We make certain that everyone knows the plan and their roles in it to ensure ongoing service and support to our clients.

Prepare

Preparation includes building an emergency contact list at the beginning of the hurricane season for each site. These lists are critical and, when a storm is approaching, keep teams updated on who may need to evacuate.

Support

There is an image of a handshake

Our support ensures that clients and other companies are contacted to arrange lodging, transportation, and food and other grocery items in case operations at our offices and/or warehouses are temporarily suspended.

Assessment & Replenishment
